**Title : Full stack Java developer****Location : Birmingham****Client : Mastek / Public sector****Skills required:**

**Essential:**

Java, JUnit, Powermock, Mockito, Maven, Spring, TDD, REST and SOAP Web Services, Agile (Scrum), Spring boot, Angular.

A unique development opportunity to work for an innovative market leader as a Java Developer.

Require a Java developer with strong OO experience to develop new features for our portfolio of J2EE products.

You will join a team that prides itself on collaboration and engineering the best possible Java J2EE code.

**Essential:**

- o At least 10 years of hands-on experience with large scale Java j2ee E-commerce projects.
- o Experience in large scale integration projects involving messaging, web-services and distributed systems.
- o Extensive experience with web-services - (SOAP and RESTful)
- o Extensive experience with testing frameworks like JUnit, Mockito, Powermock, JMock, DBUnit.
- o Agile development methods - Scrum, Kanban, TDD, BDD etc
- o Extensive experience of Continuous Integration methodologies - Maven, GIT, Jenkins, SonarQube
- o Must have experience as lead
- o Able to help identify and solve the technical issues that we encounter on the project but think the overall direction is established.
- o Create spike solutions to figure out answers to complex technical/design problems.

Thanks & Regards,
